SUMMARY

Restaurant operations manager who builds the tools the team runs on. Managed 150–200 staff at a three-floor, 1,000+ cover-per-day restaurant (~$30M in annual sales), and built a web app that connects Toast, HotSchedules, and ADP data to automate the nightly close and payroll. Uses AI-assisted development to turn messy operational processes into working software.

FEATURED PROJECT

AVRA Daily Close – Restaurant Operations Web App 2026

Built with Claude Code (Python) · Used nightly at AVRA · Case study & live demo

- Designed and shipped a web app that ingests Toast POS shift reports, HotSchedules rosters, and ADP payroll data, applies tip-pool rules (pool cuts, role changes, lunch vs. dinner service), and generates payroll-ready Excel files.
- Cut the nightly close for a 50+ employee tip pool from about 2 hours to 30 minutes.
- Added punch-report checks and an employee setup tool to catch payroll errors before submission.
